This list contains all the error numbers and error descriptions for Microsoft Access 2007, 2003, 2002, and 2000.

We hope you find this list useful for reviewing errors that may appear in your application.

To minimize the space, duplicate descriptions are eliminated, so if all four Access versions have the same error description for an error ID, only the 2007 version is shown. Similarly, if the Access 2003 version is the same as 2007, it's not shown, but if the 2002 version differs, it is shown.

To reduce space, undefined error descriptions which provide no meaning ("Application-defined or object-defined error") are excluded from this list.
